From the desk of the President

Dear Members,

It gives me great pleasure to share that our recent Annual General Meeting was held successfully with the enthusiastic presence of more than 265 members. Your strong participation reflects the unity and commitment of our members toward the growth and development of Sanand GIDC.

We were honored by the presence of Sansad Shri Mayankbhai Naik and MLA Shri Kanubhai Patel as our distinguished guests. Their encouraging words and support have further strengthened our confidence in working closely with the government to develop Sanand GIDC as a model industrial estate. They appreciated the efforts of SIA in improving infrastructure and assured cooperation in resolving key industrial issues.

One of the important initiatives started this year is the Door-to-Door Solid Waste Collection System in GIDC Sanand. This step is aimed at improving cleanliness, hygiene, and sustainable waste management across the estate. I sincerely request all members to extend full cooperation, especially in proper segregation and timely disposal, so that this system can function effectively.

I am also pleased to inform you that the Sewage Treatment Plant (STP) project is currently under construction and is expected to be operational by May 2026. This project will play a crucial role in ensuring environmental compliance and supporting smooth industrial operations in Sanand GIDC.

Our plantation and green initiatives are continuing regularly. These efforts reflect SIA's strong commitment toward environmental protection and sustainable development. I request members to actively support the maintenance and care of trees planted around their units so that our green mission delivers long-term benefits.

Looking ahead, SIA remains focused on infrastructure upgradation, better services, environmental sustainability, safety, and ease of doing business. With the continued support of our members and proactive coordination with government authorities, we are confident of achieving these goals.

I sincerely thank all members, managing committee members, and staff for their continuous support and cooperation. Together, let us work with unity and determination to make Sanand GIDC a smarter, cleaner, and greener industrial estate.

With warm regards,

Ajit Shah

President on behalf of team SIA

From the desk of the Secretary

Dear Entrepreneurs, Business Friends and All Stakeholders,

I am extremely happy and satisfied to present to you this new and expanded . This Magazine is not just a catalogue, but it is a symbol of the hard work, vision and progress of every industry and business operating in Sanand GIDC.

Sanand GIDC has emerged as a leading and dynamic hub in the industrial sector of Gujarat. In the last few years, we have all together contributed significantly in making this industrial estate a modern and developmental hub. Its geographical location, well-planned infrastructure facilities like wide roads, uninterrupted power supply, adequate water supply, and efficient connectivity (proximity to National Highways and Ports) have made Sanand GIDC a preferred destination for investors.

In this GIDC, industries from various sectors, from automobiles to semiconductors, from pharmaceuticals to food processing, have established their foothold. This diversity is our strength, which helps us to remain competitive in the global market. Both local and international investments have created numerous employment opportunities here and boosted the local economy.

In this development journey, we have also received the full guidance and support of the Honorable Home and Cooperation Minister of India, Shri Amitbhai Shah. His support has been inspiring to further accelerate the development of Sanand GIDC, as this area falls under his parliamentary purview. His visionary leadership and commitment to local industries have always been encouraging for us.

The main objective of this magazine is to strengthen mutual connectivity and cooperation among all the members of Sanand GIDC. It will provide you with a comprehensive platform to establish contacts with other industries, explore new business opportunities and exchange knowledge and experiences. I firmly believe that this will enhance unity and harmony in our industrial community, which is indispensable for collective development.

We, as the Secretariat of GIDC, are always committed to providing the best facilities and support to the entrepreneurs. Your suggestions and feedback are invaluable to us, as they help us in formulating future plans and making Sanand GIDC more progressive.

I express my heartfelt gratitude to all of you for your cooperation, hard work and vision for the future. Let us all together take Sanand GIDC to new heights of development.

Best wishes,

A handwritten signature in black ink, appearing to read 'Sharadkumar Patel'.

Sharadkumar Patel
Secretary, Sanand GIDC

SANAND INDUSTRIES ASSOCIATION

Visit of Indo-American Chamber of Commerce (IACC) Delegation to GIDC Sanand

Today, the newly elected President of the Indo-American Chamber of Commerce (IACC) along with newly elected President (Gujarat) and his team visited the Sanand GIDC Estate. The delegation was warmly welcomed by the Office Bearers of the Sanand Industries Association (SIA).

During the interactive meeting, fruitful discussions were held on promoting MSME exports to the United States, exploring new avenues of collaboration, and enhancing trade opportunities between local industries and American markets. The IACC team also showed keen interest in supporting initiatives for skill development and worker training within GIDC Sanand, to strengthen industrial growth and global competitiveness.

The delegation further visited the GIDC administrative office, where officials explained the integrated control and monitoring system for street lighting, water supply, and estate security management. The team appreciated the digital management approach and efficiency of GIDC operations.

Later, the visitors were taken to the Oxygen Park, where they admired the green initiatives undertaken by SIA and GIDC to promote environmental sustainability and a healthier industrial ecosystem.

Overall, the visit marked a positive step toward building stronger Indo-American business relations and advancing the vision of Smart and Sustainable GIDC Sanand.

SANAND INDUSTRIES ASSOCIATION

Dy. Chief Minister Shri Harshbhai Sanghavi Visits GIDC Sanand; Holds Meeting with Sanand Industries Association Today, the Hon'ble Deputy Chief Minister of Gujarat, Shri Harshbhai Sanghaviji, visited GIDC Sanand and held an important meeting with the office bearers and leaders of the Sanand Industries Association (SIA) in presence of ACS Mamta varmaji, vcmd GIDC Pravina D. K.

During the meeting, detailed discussions were held on the key infrastructure requirements essential for the sustainable growth and smooth functioning of GIDC Sanand. The representatives of SIA highlighted the urgent need for strengthening core infrastructure, particularly focusing on the following areas:

1. Underground (U/G) drainage system to address waterlogging issues and ensure efficient wastewater management.
2. Workers' residential facilities, including affordable and safe accommodation for the growing workforce in the industrial estate.
3. Local transportation facilities to improve connectivity within GIDC Sanand and ensure smooth daily commute for workers and staff.

The Hon'ble Deputy Chief Minister gave a patient hearing to all the issues raised by SIA and assured that the Government of Gujarat is fully committed to resolving these matters on a priority basis. He directed the concerned departments to take up the issues in an urgent mode and emphasized time-bound solutions.

Shri Sanghaviji also assured the representatives of SIA that they may directly approach him for any further issues or requirements related to GIDC Sanand, and reiterated that the government will extend all necessary support to strengthen infrastructure and promote industrial development.

The Sanand Industries Association expressed its gratitude to the Hon'ble Deputy Chief Minister for his proactive approach, positive assurance, and continued support towards making GIDC Sanand a model industrial estate.

SANAND INDUSTRIES ASSOCIATION

14th Annual General Meeting (AGM)

K.P. Woven Private Limited

A Champalal Group Company

Mr. Prakash Parekh
Promoter

Prakash Parekh, its promoter is a strong, fearless businessman. He is a Chemical Engineer with a post-graduation degree in SAP from Monash University. He is also the Managing Director of Flagship company of the group Plastene India Limited, which he has built from the ground zero in just a span of 14 years. With over 22 years of experience in the Plastic Industry, he is stalwart of this industry. Equipped with a lot of experience and great analytical skills he is a magician of management.

Mr. Pritesh Parekh
Director

Pritesh Parekh, the Director is a PGDM holder in Business Management from Tollani Institute of Management. He has over 20 years of experience in the Plastic industry. Specialising in operations and sales and because of his great can-do attitude and empathy towards the manpower and our clients he holds command on operation and marketing. Pritesh is responsible for managing almost 3000 MT of market for K. P. Woven and all its sister concerns in the Champalalgroup.

K.P. Woven Private Limited is a part of renowned Champalal Group of companies engaged in the manufacturing of Flexible Intermediated Bulk Containers (FIBCs) or Jumbo bags. Group is second largest manufacturer of FIBC in India. This unit was specifically put up to cater to the requirements of Food and Pharmaceutical industry to meet their requirements of bulk packaging needs.

Equipped with State of the art machinery sourced from the best suppliers in India and Europe. It's Swiss weaving machinery from Sulzer equips the company to also manufacture various kinds of Geotextiles which can serve various purposes and are useful in various industries. With installed capacity of over 1100 MT of woven plastic products, this plant is one of the best in the country, and we are targeting 90% of its sales from exports. Majority of its clients are based in the USA, Europe and South America, while also catering to some of the big names in the domestic chemical industry.

Apart from that, this facility is one of a kind facility with complete air conditioning from granules to bag hence eliminating the risk of contamination. K.P. Woven firmly believes in supplying its customers with top quality bulk bags which are extremely safe to use and have a great visual appeal. We have a zero tolerance policy towards taking deviation and believe in supplying our customers with exactly what they need.

Yesterday, on 11th December, we had a highly productive and result-oriented meeting with senior GIDC officials at the Gujarat Chamber of Commerce. The meeting was held in the esteemed presence of our Hon. Deputy Chief Minister Shri Harsh Sanghavi Saheb, ACS Industries Smt. Mamta Vermaji, and VCMD Smt. Pravina D.K.

During the meeting, we presented and discussed the key issues affecting industries in our estate, particularly:

1. Double Taxation

2. Stamp Duty-related challenges

3. Tree Plantation and compliance matters

All points were discussed in depth, and the dignitaries gave their full attention to the concerns raised by our association. We are pleased to share that the responses from the officials were very encouraging. They have assured us that concrete steps will be taken to resolve all these issues within a short period of time.

We sincerely appreciate the proactive approach and supportive attitude of all the government authorities present. Their commitment gives us confidence that long-pending matters will soon be settled in the interest of industries and overall development of the estate.

What Smart Manufacturers Are Already Gaining in Gujarat - Are You?

An Executive Snapshot of MSME Subsidies for Manufacturing Units in Gujarat

CA Dinesh Shah

Dinesh J Shah & Associates

(M) 9825373707 | dineshjshahca@gmail.com

A Chartered Accountant with over 25 years of experience in Industrial finance and Government subsidy advisory, specializing in project structuring and maximization of incentive benefits for MSMEs and manufacturing enterprises.

Introduction

Gujarat has developed one of the most structured and supportive subsidy environments for manufacturing MSMEs in India. Through a combination of Gujarat State policies and Central Government schemes, manufacturers can significantly reduce project cost, lower operating expenses and improve long-term profitability.

This guide presents a clear and practical snapshot of the most relevant subsidy schemes currently applicable for manufacturing units.

Key Highlights at a Glance

- Substantial reduction in Project investment cost
- Lower interest burden on bank loans
- SGST reimbursement improving cash flow
- Power cost and electricity duty savings
- Sector-specific subsidies for priority industries
- Additional Central Government financial support

TABLE 1: Key Gujarat State Subsidy Policies for Manufacturing

Scheme	Industry Slab	Core Benefits
Aatmanirbhar Gujarat Scheme for Assistance to MSMEs (2022)	All MSME Manufacturing Units (Micro, Small & Medium)	<ul style="list-style-type: none"> ● Capital Subsidy up to 25% (Micro units) ● Interest Subsidy up to 7% ● SGST Reimbursement up to 75% ● 100% Electricity Duty Exemption ● Power Connection Subsidy ● Solar Interest Subsidy (5%–7%) ● Support for CGTMSE, Rent, Exhibition, EPF Subsidy

Gujarat Textile Policy 2024	Textile, Garment & Technical Textile Units	<ul style="list-style-type: none"> ● Capital Subsidy ● Interest Subsidy ● Power Subsidy ● Payroll Subsidy ● Electric Duty Exemption
Gujarat Semiconductor Policy	Semiconductor & Chip Manufacturing Units	<ul style="list-style-type: none"> ● Land Subsidy ● Capital Subsidy ● Power Tariff ● Electric Duty Exemption ● Water tariff ● Stamp Duty
Gujarat Biotechnology Policy	Biopharma & Biotechnology Manufacturing Units	<ul style="list-style-type: none"> ● Capital Subsidy ● Interest subsidy ● OPEX Assistance ● EPF Subsidy ● Electricity Duty Support
Gujarat State New IT/ITes Policy	IT and IT-enabled services	<ul style="list-style-type: none"> ● CAPEX Support ● OPEX Support ● Interest Subsidy ● Employment Generation Assistance
Gujarat Electronics Policy	Electronics manufacturing units	<ul style="list-style-type: none"> ● Capital Subsidy ● Interest subsidy ● Stamp Duty ● Power Tariff & Electric Duty ● Logistics support

TABLE 2: Important Central Government Schemes for MSME Manufacturing

Scheme	Industry Slab	Core Benefits
PMEGP Scheme	New Micro Manufacturing Units	Capital subsidy 15% – 35% of project cost
PMFME Scheme	Micro Food Processing Units	35% capital subsidy on project cost maximum Subsidy Rs. 10 lacs
Biomass Programme	Briquette, Pellet & biomass Manufacturing Units	Financial assistance upto Rs. 5 crore
RPTUAS	Pharmaceutical MSMEs	Capital Subsidy Upto 20% max. Rs.

Scheme	upgrading to Revised schedule M & WHO	2 crore
CGTMSE Scheme	All MSME Units	Collateral-free loan guarantee support
EPCG Scheme	Export-Oriented Manufacturing Units	Zero customs duty on imported capital goods
MOOWR Scheme	Units using imported material	Duty-free bonded manufacturing facility
PLI Schemes	Selected Manufacturing Sectors	Incentive on incremental production / sales

How These Subsidies Benefit MSME Units?

Strategic utilisation of these schemes helps MSMEs to: - Reduce initial capital investment - Lower loan interest burden - Minimise power and electricity expenses - Improve cash flow and profitability - Strengthen financial stability - Enable structured expansion and scalability

Practical Impact Illustration

For a project of Rs.10 Crore with an investment of Rs.6 Crore in Plant & Machinery, combined incentives can reduce the effective financial burden by approximately 30% - 40% over time, thereby significantly improving project viability.

Conclusion

Gujarat's MSME subsidy framework provides a strong financial foundation for manufacturing entrepreneurs. When these incentives are planned and integrated at the project stage itself, they act as a powerful growth catalyst, improving profitability, reducing financial stress and enhancing long-term business sustainability.

For MSME promoters, understanding and utilising these subsidies is not merely beneficial - it is a strategic necessity for building competitive and financially stable manufacturing enterprises.

For any future information/clarification, please feel free to contact on +91 9825373707.

Vishal Multitrade Pvt. Ltd.

VMPL offers a diverse range of TMT Steel Bars & Structural Steel that meet industry standards and specifications. To ensure high strength, durability, and corrosion resistance, these steel bars are produced utilizing cutting-edge technology and put through a rigorous quality control procedure. The TMT steel bars are designed to withstand high levels of stress and provide exceptional structural stability in construction projects.

GST REFORMS IN INDIA: PRACTICAL CHANGES & THEIR IMPACT

CA Dinesh Shah

Dinesh J Shah & Associates

(M) 9825373707 | dineshshahca@gmail.com

A Chartered Accountant with over 25 years of experience in GST, Industrial finance and Government subsidy advisory, specializing in project structuring and maximization of incentive benefits for MSMEs and manufacturing enterprises.

Introduction

GST in India has moved from an experimental phase to a system of controlled, technology-driven compliance. The reforms now directly affect daily operations, cash flows, pricing strategies, and business sustainability. From a practitioner's perspective, GST reforms must be understood not by policy intent, but by what has actually changed on the ground and how it impacts industry.

What Has Actually Changed – Ground-Level Impact

1. Faster Registration & Predictable Compliance

- GST Registration is now approved within 3 days for normal-risk applicants.
- Less physical verification → faster onboarding for new MSMEs.
- Pre-filled returns (GSTR-3B & GSTR-1) have reduced errors and notices significantly.
- E-invoice & e-way bill systems now auto-sync → lesser mismatch disputes.

Outcome:

MSMEs save time, avoid unnecessary litigation, and maintain timely compliance without an accountant's daily involvement.

2. Cash Flow Has Improved for Manufacturers

Across sectors like packaging, plastic moulding, engineering components, and food products, the correction of inverted duty structures and lower rates on essentials have resulted in:

- Lower working-capital blockage
- Faster refund cycles (especially for exporters)
- Quicker ITC utilisation

Outcome:

More cash remains within the business - directly improving liquidity.

3. Real Reduction in Cost of Production

With more goods shifted to the **5% slab**, many MSMEs now report:

- Lower GST on inputs
- Lower GST on outward supplies
- Lower vendor pricing due to simplified slabs
- Ability to revise selling price downward or increase profit margin

Example sectors benefitted:

- FMCG & food processing
- Plastics & packaging
- Small engineering units
- Daily use consumer goods
- Ready-to-cook snacks units (papad/3D pellets)

Outcome:

Improved pricing competitiveness and better margin control.

4. Fewer Notices & Reduced Litigation Pressure

The earlier era of:

- frequent mismatches,
- repeated departmental notices,
- unnecessary scrutiny,

has largely reduced because of:

- AI-based return analytics,
- auto-matching of invoices,
- better classification clarity.

Outcome:

MSMEs now focus more on business and less on procedural disputes.

5. Demand Growth in Consumption Sectors

Lower GST on daily-use items has supported **consumer demand**, benefitting manufacturing and trading MSMEs associated with:

- household goods
- FMCG
- packaging
- food processing
- distribution networks

Outcome:

Higher sales volumes and better capacity utilisation.

6. Pricing Strategy Is Now More Stable

Earlier, frequent classification changes led to uncertain pricing. Now, with simplified slabs (5%, 18%, 40%):

- Pricing decisions are more predictable
- Quoting to customers is easier
- Less confusion in valuation
- More consistent invoicing practices

Outcome:

Better planning for MSMEs, especially those bidding in tenders or supplying corporates.

7. Compliance Cost Has Reduced

Due to automation:

- Monthly reconciliation time has dropped
- Accountant dependency has slightly reduced
- Small units manage compliance with basic ERP or accounting software

Outcome:

Recurring compliance cost has decreased for micro and small enterprises.

Conclusion – What This Means for MSMEs

From a practical ground-level perspective, **GST reforms have created measurable improvements** for MSMEs:

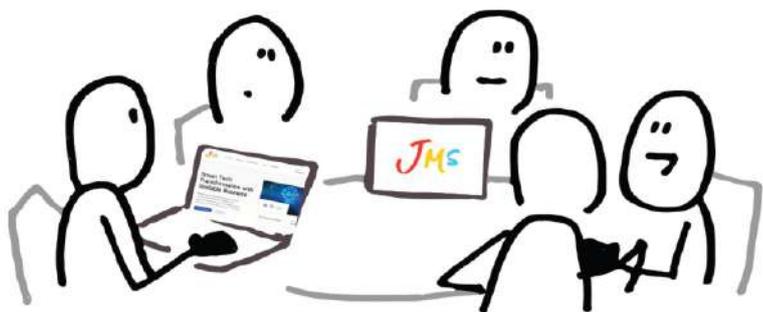

- Faster processes
- Lower costs
- Better cash flow
- Clearer compliance
- Higher demand
- More stability in pricing and working capital planning

While complexities still exist in specific sectors, the general direction of GST reforms is **positive, growth-oriented, and MSME-friendly**.

As practitioners, we must help businesses understand not just the law, but the practical operational benefits emerging from these reforms - and ensure MSMEs align their systems, pricing, and cash-flow planning to fully leverage these changes.

Sustainability and Technology – The Twin Engines Driving India’s Manufacturing Growth

By Elmer Products Pvt. Ltd.

A Changing Industrial Landscape

Manufacturing has always been one of the strongest pillars of India’s economy. However, success today is no longer measured by volume alone. Businesses are now evaluated by how efficiently they operate and how responsibly they use resources. Buyers — both domestic and international — increasingly expect transparency, sustainability, and traceability from their suppliers.

Government initiatives such as Make in India, Atmanirbhar Bharat, and the Production Linked Incentive (PLI) scheme are encouraging Indian industries to adopt advanced technologies and global standards. Meanwhile, environmental policies and Extended Producer Responsibility (EPR) frameworks are prompting manufacturers to think about the complete product life cycle — from raw material sourcing to end-of-life recycling.

Green Manufacturing – The Smarter Way Forward

Sustainability has moved from being a goodwill gesture to a business necessity. Companies that focus on energy efficiency, waste reduction, and environmentally friendly materials are seeing real benefits in both reputation and performance.

At Elmer, we’ve always believed that quality and sustainability can go hand in hand. Our processes are built on the principle of zero discharge and zero defect. Through better process control, optimized material use, and waste segregation, we’ve been able to minimize our environmental footprint while maintaining top-quality standards.

A key example is our recent innovation — bamboo powder-based “Stand-Up Caps” for laminated tubes. By replacing a portion of conventional polymer with natural filler, we reduce our carbon footprint while maintaining product strength and performance. Innovations like these show how sustainability can create new opportunities for design and differentiation.

Renewable Energy and Resource Efficiency

Energy costs and sustainability targets are encouraging more industries to adopt renewable power sources. Across India, manufacturing units are turning to solar and wind energy to meet their electricity requirements. Even MSMEs are exploring rooftop solar systems and shared green energy models to reduce costs and carbon emissions.

Resource optimization doesn’t stop at energy. Efficient water recycling, closed cooling loops, and intelligent monitoring systems are becoming essential parts of modern

manufacturing. These measures not only conserve resources but also improve operational reliability and long-term cost savings.

Digital Manufacturing – The New Industrial Revolution

The digital transformation of factories is well underway. Technologies such as automation, real-time monitoring, and AI-based quality control are redefining production efficiency. What was once limited to large corporations is now accessible to medium and small enterprises as well.

At Elmer, we are developing our own Manufacturing Execution System (MES) to digitally connect our injection moulding machines, moulds, and quality systems. This will allow us to capture production data in real time, track materials from raw stage to finished goods, and generate electronic batch manufacturing records (eBMRs).

The result will be greater transparency, reduced manual work, and improved process control — all critical elements of modern, compliant manufacturing.

MSMEs – The Backbone of Indian Industry

India's MSMEs continue to be the foundation of its industrial growth, contributing nearly 30% to GDP and employing millions of people. However, they often face challenges in financing, technology adoption, and compliance management.

Recent government efforts have made things easier for MSMEs. Schemes like Udyam Registration, Credit Linked Capital Subsidy Scheme (CLCSS), and digital platforms such as GeM and ONDC are helping small manufacturers modernize and reach new customers. Simplified GST procedures and digital documentation have reduced delays and improved transparency in operations.

Banking and Finance for a Sustainable Future

The financial sector is playing an increasingly proactive role in supporting industrial growth. Banks and financial institutions now offer specialized loans for green projects, renewable energy adoption, and technology upgradation. Organizations like SIDBI are actively helping MSME clusters adopt cleaner technologies and improve productivity.

Digital banking platforms and AI-driven credit assessments are also making it easier for smaller manufacturers to access funding without heavy collateral. This shift towards data-driven financing is encouraging companies to formalize operations and focus on long-term sustainability.

The Road Ahead – Innovation and Circular Thinking

The manufacturing world is evolving towards greater traceability, accountability, and circular economy practices. Global customers are now asking not only for high-quality products but also for proof that they are made responsibly.

The EPR (Extended Producer Responsibility) framework in India supports this shift by requiring producers and recyclers to ensure proper recovery and recycling of materials. At Elmer, we are aligning ourselves with EPR requirements by working with authorized recyclers and maintaining transparent records of material usage and recovery.

Conclusion

India's manufacturing story is moving towards a cleaner, smarter, and more responsible future. The twin forces of sustainability and technology are no longer separate paths — they are deeply interconnected and essential for long-term success.

At Elmer Products Pvt. Ltd., we see this change as a chance to lead by example. Whether through renewable materials, digital transformation, or responsible manufacturing practices, our goal remains clear — to build a future based on “Zero Defect, Zero Discharge, and Infinite Possibilities.”

About Elmer Products Pvt. Ltd.

Elmer Products Pvt. Ltd. is a leading manufacturer of precision plastic components for FMCG and pharmaceutical packaging. The company specializes in laminated tube caps and shoulders in 19mm, 22mm, 28mm, and 35mm sizes, with several new developments in progress. Elmer operates under ISO and ZED certifications, following strict cGMP and traceability standards to ensure consistent quality, innovation, and sustainability in every product.

SIA NEWS

Local transportation, Need of GIDC Sanand

GIDC Sanand has emerged as one of Gujarat's fastest-growing industrial hubs, contributing significantly to the state's economic development and employment generation. From automotive giants to semiconductor suppliers, Sanand's GIDC estate houses over 600 industries, including more than 50 multinational corporations and provides direct employment to thousands of workers. Despite this remarkable growth, a critical infrastructure gap remains – efficient and reliable local transportation for workers, professionals, students, and the wider community.

Addressing this gap is no longer an option; it is an urgent necessity for sustainable industrial and social progress.

The Current Transportation Scenario in GIDC Sanand

Presently, the transportation infrastructure in and around GIDC Sanand is predominantly dependent on private vehicles, occasional autorickshaws, and limited shared services. This absence of organized local commuting options creates a daily logistical challenge for workers and professionals who travel to and from industrial areas. Many employees have to rely on personal two-wheelers, buses or cars, leading to congestion, increased travel cost, safety issues, and environmental stresses.

The nearest major transit terminals in sanand are several kilometers away from the industrial estate, and public transport options connecting them are sporadic or inadequate. This lack not only affects daily commuting but also makes it difficult for businesses to attract and retain skilled workers who demand reliable and affordable transportation.

Why Local Transportation is Essential

1. Enhancing Workforce Mobility

The backbone of any industrial region is its workforce. For industries in Sanand, ensuring that workers can reach factories on time every day is crucial to maintaining productivity levels. Local transportation options like feeder buses, shuttle services, and last-mile connectivity can:

- Reduce travel time for workers.
- Minimize absenteeism due to commuting issues.
- Enable flexible shift rotations without transport complications.

With organized local transport, industries can streamline operations and improve workforce satisfaction – a win-win for both employers and employees.

2. Reducing Dependency on Private Vehicles

The current dependence on private vehicles has several negative consequences:

- Increased traffic congestion on narrow arterial roads.
- Higher vehicular emissions, impacting air quality.
- Elevated operational costs for workers due to fuel, maintenance, and parking fees.

Introducing local transportation systems such as regular bus routes, company-operated transport, or shared electric shuttles can significantly reduce the number of individual vehicles on the road, leading to a healthier, cleaner environment and lower commuting costs for workers.

3. Ensuring Road Safety

Industrial zones naturally attract high levels of vehicle movement – heavy trucks, commercial vehicles, employee cars, two-wheelers, and delivery vans. Without a regulated transportation system, the risks of road accidents increase. Local transport services operating on fixed routes and with trained drivers help improve overall traffic management and road safety for everyone. This is especially important during peak morning and evening hours when traffic volume is the highest.

4. Making Sanand Attractive for Talent

The new generation of skilled professionals places a high value on quality of life and ease of commuting. A well-planned local transportation system can make Sanand more attractive to talent from nearby cities like Ahmedabad, Viramgam, Gandhinagar, and beyond. Reliable transport connectivity will empower professionals to choose employment in Sanand without worrying about the hassles of daily travel.

5. Supporting Inclusive Growth

Not all workers have access to personal vehicles. Many depend on irregular shared rides or pay high costs for last-mile travel. A standardized local transportation system ensures inclusive mobility, enabling even low-income workers to travel affordably and safely. This, in turn, leads to higher social equity and a more balanced community ecosystem.

Types of Local Transportation Solutions Needed

1. Regular Bus Services

A network of buses connecting key residential areas with industrial clusters, educational institutes, and public utility points can cater to the largest segment of daily commuters. These buses could operate on predetermined schedules – early morning, mid-shift changes, and late evenings – to align with industry working hours.

2. Shuttle Services Within Industrial Estate

Within the sprawling GIDC Sanand area, intra-estate shuttle buses or electric mini-buses can help workers move between factories, canteens, medical centres, and transport hubs. This will especially benefit large estates where walking long distances is difficult.

3. First- and Last-Mile Connectivity

Many employees live in nearby towns, villages, and satellite colonies. Shared autos, e-rickshaws, and bicycle-sharing facilities can improve first- and last-mile connectivity, bridging the gap between bus stops and homes.

4. Digital Booking Platforms

Smart city solutions, such as app-based booking and tracking of local transport, will enhance route efficiency and convenience for users. Real-time bus tracking, digital payments, and route updates can make public transport adoption simpler and more user-friendly.

Benefits to Industries

1. Increased Productivity

When workers arrive on time, operations run smoothly. A dependable transit system minimizes delays and helps factories maintain optimal production schedules.

2. Lower Attrition Rates

The stress of daily commuting is a major contributor to employee turnover. Providing or facilitating local transport options improves employee satisfaction and retention.

3. Cost Savings

Industries could collaborate on shared transportation solutions, pooling resources to subsidize transport costs. Reduced employee travel costs can indirectly enhance disposable income and local spending, boosting the region's economic vibrancy.

Environmental and Social Benefits

Local transportation infrastructure offers environmental benefits by reducing emissions and fuel consumption. Public transit also decreases carbon footprints and encourages sustainable industrial growth.

Socially, organized transport fosters safer mobility for women, students, and senior citizens, contributing to an inclusive and secure community around GIDC Sanand.

Role of Government and Corporates

For local transportation systems to succeed, collaboration between government bodies and corporate stakeholders is essential. Key actions may include:

Integrating Sanand in the regional transport planning initiatives of Ahmedabad-Gandhinagar.

Allocating budget for dedicated industrial transit routes.

Supporting public-private partnerships to share operational costs.

Providing incentives for electric buses and environmentally friendly mobility.

Industries can collectively contribute through industrial associations, such as the Sanand Industries Association (SIA), to design and operate feeder services tailored to workforce needs. With over 600 units active in GIDC Sanand, this collective impact could be transformative.

Industries can collectively contribute through industrial associations, such as the Sanand Industries Association (SIA), to design and operate feeder services tailored to workforce needs. With over 600 units active in GIDC Sanand, this collective impact could be transformative.

Conclusion

GIDC Sanand stands on the cusp of becoming an even greater industrial powerhouse. However, without a strong local transportation framework, its growth may be constrained by operational inefficiencies, workforce mobility challenges, and lower attractiveness to talent. Introducing reliable, affordable, and sustainable local transport services is not just a logistical need – it is a strategic imperative for inclusive development.

By investing in local transportation infrastructure, Sanand can ensure safer commuting, economic competitiveness, environmental sustainability, and, most importantly, improved quality of life for its workforce and residents.
