# From the desk of the .... President

Sanand Industries Association (SIA), along with its member industries, successfully organized an interactive meeting today focusing on export opportunities in Zimbabwe, marking an important step towards strengthening international trade relations for industries of GIDC Sanand.

Sanand's growth story began in 2008 with the landmark decision to bring the Tata Motors Nano project to Sanand. At that time, Shri Narendra Modiji was the Chief Minister of Gujarat, and his visionary leadership laid the foundation for what would eventually become one of India's most dynamic industrial ecosystems. The arrival of the Nano car plant was not merely an industrial investment; it was a turning point that changed the destiny of Sanand forever.

Many of our members, including myself, have been direct witnesses to this extraordinary journey from 2011 to 2026. We have seen Sanand evolve from vast open lands into a vibrant industrial hub bustling with activity. What started as an Auto Hub gradually attracted ancillary units, engineering industries, logistics players, and global corporations. Infrastructure improved, connectivity strengthened, and confidence among investors grew rapidly.

Over the years, Sanand GIDC has expanded far beyond automobiles. Today, in 2026, we proudly stand at the threshold of becoming a Semiconductor Hub. The shift from Auto Hub to Semiconductor Hub reflects not only diversification but also technological advancement and global integration. The entry of high-tech industries has elevated the profile of Sanand at the national and international level. It has positioned Gujarat as a strong contender in the global semiconductor supply chain and reinforced India's vision of self-reliance in critical technologies.

This transformation has generated employment for thousands, empowered MSMEs, strengthened supply chains, and created opportunities for innovation and entrepreneurship. More than 550 operational units, including 54 multinational corporations, are contributing to economic growth and making Sanand a global image estate. The industrial culture here is driven by resilience, collaboration, and long-term thinking.

The Prime Minister's visit is a reaffirmation of the faith and confidence that national leadership has in Sanand's potential. It reminds us that visionary policies, industry-government partnership, and collective effort can create extraordinary results. We deeply appreciate the continued support of both the Central and State Governments in developing infrastructure, promoting ease of doing business, and encouraging emerging sectors.

As industries of Sanand, we are not stopping here. We have collectively prepared our Vision 2030 roadmap for GIDC Sanand. Our focus is on sustainable growth, smart infrastructure, environmental responsibility, and global competitiveness. Key priorities include strengthening common facilities, improving waste management systems, expanding green cover, enhancing skill development, building worker-friendly infrastructure, and promoting clean and advanced manufacturing.

We aim to transform Sanand into a model industrial estate—smart, green, and future-ready. The Vision 2030 plan reflects our commitment to inclusive growth, where industries thrive alongside communities, and development goes hand in hand with sustainability.

The journey from 2008 to 2026 has been inspiring. From the Nano car to semiconductors, from a regional auto cluster to a globally recognized manufacturing destination, Sanand's progress is a testament to visionary leadership and collective determination.

With warm regards,

**Ajit Shah**

President on behalf of team SIA

# From the desk of the Secretary ....

The recent visit of our Hon'ble Prime Minister, Shri Narendra Modi, to Sanand GIDC on 28th February 2026 has been a moment of great pride and encouragement for the entire industrial community of Sanand. His visit reflects the growing national importance of this industrial region and acknowledges the remarkable progress achieved by industries operating here.

Sanand's industrial journey began in 2008 with the landmark establishment of the Tata Motors Nano project under the visionary leadership of Shri Narendra Modiji during his tenure as the Chief Minister of Gujarat. This historic initiative laid the foundation for Sanand's transformation into a major manufacturing destination. Over the years, the region has attracted numerous automotive companies, ancillary industries, engineering units, logistics providers, and multinational corporations, creating a strong and vibrant industrial ecosystem.

Today, Sanand GIDC stands as one of Gujarat's most prominent industrial clusters, with more than 550 operational units. The area has gained recognition not only as a major automobile manufacturing hub but is also emerging as a significant semiconductor manufacturing destination, reflecting its growing technological importance and global industrial relevance.

This remarkable growth has been supported by continuous improvements in infrastructure, strong connectivity, and the proactive support of the Government of Gujarat. The industrial expansion in Sanand has generated substantial employment opportunities and strengthened the MSME sector, contributing significantly to the state's economic development.

As the Secretary of the Sanand Industrial Association, I firmly believe that collaboration among industries, government authorities, and stakeholders is essential for sustaining this momentum of growth. Our association remains committed to addressing industrial concerns, facilitating communication with authorities, and working collectively towards the development of better infrastructure, environmental sustainability, and a business-friendly ecosystem within Sanand GIDC.

Looking ahead, our focus remains on strengthening industrial cooperation, promoting responsible growth, and preparing Sanand for future opportunities. With continued support from the government and active participation from member industries, Sanand is well positioned to achieve even greater milestones in the years to come.

The Hon'ble Prime Minister's visit has further strengthened the confidence of the industrial community and has reaffirmed Sanand's role as an important pillar in India's industrial growth story.

Best wishes,

A handwritten signature in black ink, appearing to read 'Sharadkumar Patel'.

**Sharadkumar Patel**

Industries welcoming our beloved Prime minister Shri Narendra Modi in GIDC Sanand

SIA NEWS

## Zimbabwe Export Interaction & MoU Signing

Sanand Industries Association (SIA), along with its member industries, successfully organized an interactive meeting today focusing on export opportunities in Zimbabwe, marking an important step towards strengthening international trade relations for industries of GIDC Sanand.

More than 50 member industries from various sectors actively participated in the session and had a direct interaction with the Hon'ble Deputy Minister of Industries and commerce shri Rajesh Modi, Government of Zimbabwe. During the interaction, the Hon'ble Minister shared detailed insights on Zimbabwe's industrial ecosystem, priority sectors, import requirements, investment-friendly policies, and incentives offered to foreign industries.

The Hon'ble Minister of Zimbabwe cordially invited Indian industries, especially MSMEs and large industries from GIDC Sanand, to establish manufacturing and processing plants in Zimbabwe, highlighting the country's strategic location, availability of raw materials, skilled manpower, and access to African markets. He also extended an invitation to SIA to lead a business delegation to Zimbabwe in the near future to explore further trade, investment, and joint venture opportunities.

# SANAND INDUSTRIES ASSOCIATION

The Hon'ble Minister of Zimbabwe cordially invited Indian industries, especially MSMEs and large industries from GIDC Sanand, to establish manufacturing and processing plants in Zimbabwe, highlighting the country's strategic location, availability of raw materials, skilled manpower, and access to African markets. He also extended an invitation to SIA to lead a business delegation to Zimbabwe in the near future to explore further trade, investment, and joint venture opportunities.

As a significant outcome of the meeting, Sanand Industries Association signed a Memorandum of Understanding (MoU) with the Hon'ble Minister of Zimbabwe. The MoU aims to provide structured support to industries of GIDC Sanand in the areas of:

- **Export promotion to Zimbabwe and African markets**
- **Participation in exhibitions, trade fairs, and buyer-seller meets**
- **Development of bilateral trade relations**
- **Market access and business facilitation for MSME and large industries**
- **Long-term industrial and commercial cooperation**

Speaking on the occasion, SIA office bearers expressed confidence that this collaboration will open new global market opportunities for industries of Sanand GIDC and strengthen India-Zimbabwe industrial ties. SIA reaffirmed its commitment to guiding and supporting member industries in expanding their international footprint.

This initiative once again reflects SIA's proactive approach in creating global platforms and growth opportunities for industries of GIDC Sanand.

## Pravin Timber Works: Delivering 360-Degree Packaging Solutions or Pravin Timber Works: Where Design, Safety and Packaging Come Together

Established in the early 1950s, Pravin Timber Works has been a quiet yet dependable partner to our industry for over seven decades. What began as a small manufacturing unit supplying wooden boxes to the flourishing textile mills of Ahmedabad has today evolved into a comprehensive 360-degree industrial packaging solutions provider, catering to diverse sectors across Gujarat and Maharashtra.

From the very beginning, the company's philosophy has remained unchanged—understand customer requirements deeply and deliver packaging solutions that ensure safety, reliability, and efficiency.

### A Journey Rooted in Adaptability

In its early years, Pravin Timber Works primarily served almost all major textile mills in Ahmedabad, providing sturdy wooden boxes essential for transportation and storage. However, with the gradual closure of textile mills, the company faced a turning point—a moment that demanded reinvention.

Rather than remaining confined to a single segment, Pravin Timber Works chose to adapt with changing industrial realities. The company expanded its focus to serve engineering units and manufacturing industries, steadily upgrading its capabilities, processes, and product offerings. This ability to evolve with time has been one of the strongest pillars of its long-standing success.

Now led by the third generation of the founding family, the company continues to combine traditional knowledge of materials with modern packaging practices, ensuring continuity along with innovation.

### From Wooden Boxes to 360-Degree Packaging Solutions

Today, Pravin Timber Works is no longer limited to manufacturing wooden packaging alone. The company offers end-to-end packaging solutions, starting from in-house design and engineering of packaging, right up to packing and container loading at customer premises.

Its solutions are designed to address real industrial challenges such as safe transit, space optimization, export compliance, and handling of sensitive or high-value goods.

The company provides a wide range of packaging materials and solutions including:

- Wooden boxes and crates
- Heavy duty corrugated boxes
- Paper-based packaging solutions
- Pneumatic nailer guns, stapler pins, and related packaging tools
- Bubble sheets and stretch films
- PET straps and accessories
- LDPE, PP, EPS, EPE foam sheets

This integrated approach allows customers to source multiple packaging requirements under one roof, ensuring consistency, accountability, and operational convenience.

## Expertise in Export & Dangerous Goods Packaging

Pravin Timber Works has developed strong expertise in export-oriented packaging, including ISPM-15 compliant wooden packaging. The company is also recognized as a Dangerous Goods Packaging Expert, approved by Indian Institute of Packaging (IIP)—a capability that reflects its technical competence and adherence to stringent safety standards.

With an in-house packaging design team, solutions are customized based on product dimensions, weight, fragility, and mode of transportation, ensuring optimal protection during transit.

## Manufacturing Strength & Sanand Presence

The company operates three manufacturing units, with its latest facility located at Sanand GIDC, equipped with state-of-the-art infrastructure. This modern plant is managed and operated by a professional team, following structured processes, quality checks, and delivery commitments.

The Sanand facility further strengthens Pravin Timber Works' ability to support the rapidly growing industrial ecosystem in and around Sanand, particularly automobile, engineering, and export-oriented units.

## Serving Diverse Industries

Over the years, Pravin Timber Works has earned the trust of clients across a wide spectrum of industries, including:

- Engineering
- Automobile
- Pharmaceuticals
- Aerospace
- Textiles
- MSMEs as well as large corporates
- Domestic and export-oriented manufacturers

This wide industry exposure enables the company to bring cross-sector insights into packaging design and execution.

## Sustainability & Responsible Packaging

Constantly aligning with evolving customer needs and global expectations, Pravin Timber Works is increasingly focusing on environment-conscious packaging solutions. The company actively promotes the use of heavy-duty corrugated boxes, which can partially replace wood by using it primarily at the base, while corrugated materials are used for the sides and top.

This approach not only reduces wood consumption but also offers efficient, strong, and sustainable packaging alternatives without compromising on safety.

## Looking Ahead

With decades of experience, a professional team, and modern manufacturing capabilities, Pravin Timber Works remains committed to supporting industrial growth through reliable, innovative, and responsible packaging solutions. As industries continue to evolve, the company looks forward to growing alongside its customers—adapting, improving, and delivering value at every stage.

## Small quote either top corner

**“Our strength lies in continuously evolving our packaging solutions to match changing industry and environmental requirements.”**

Opp. Rajesh Power House, Bol GIDC, Sanand - 382170 (GUJARAT)

Transformation  
&  
**VISION**

2030

← 2026

## Foundation of **SUSTAINABILITY**

Sanand GIDC is set to take a giant leap as Micron's semiconductor plant begins production, marking India's entry into global chip manufacturing. Supporting infrastructure like a 2,000-capacity dormitory, Gujarat's first women's industrial housing, a 360-bed ESIC hospital, internal transport services, and a Common Effluent Treatment Plant are projected to go live soon.

Under Vision 2030, Sanand GIDC will see the plantation of 1,50,000 trees and a shift of 25% of industries to green energy, with 100% renewable-powered street lighting. Rainwater harvesting will reach a capacity of 100 million litres, alongside the redevelopment of 2 lakes. A Zero Waste Policy ensures robust waste segregation for zero domestic waste.

Residences for 4,000 workers will be built under the SHRAM NIKETAN initiative. Safety upgrades include a full disaster management system and CCTV installation on all major roads. Drainage development for CSTP and CETP will begin, covering 25% of the estate. A public transport service by Sanand Industries Association under a PPP model will enhance last-mile connectivity.

Green power usage is expected to reach 17%, with a vision to achieve 100% renewable energy by 2030. These initiatives reflect the foundation of a smart, self-sustained, and eco-conscious industrial future.

In the same year, a large-scale tree plantation initiative was launched under the inspiration of Shri Amit Shah, with the first 25 trees planted as a symbolic beginning. The goal is to plant 1.5 lakh trees, reinforcing Sanand's parallel commitment to sustainability.

# 2027

## Scaling Up

# SUSTAINABILITY

Sanand's industrial ecosystem is set to deepen as supporting industries around semiconductor manufacturing begin operations. The year is likely to bring enhanced worker amenities such as public toilets, gardens, food zones, and the launch of AI-based and robotic training centres.

Disaster management training, a private helicopter service, and the launch of the Eco Knowledge Park will further boost safety, connectivity, and sustainability. Green coverage will expand by 15%, adding around 300 hectares of tree plantation. Water harvesting will be enhanced to 300 million litres, with the redevelopment of 3 lakes and the construction of 100 recharge wells.

Worker housing will scale up with residential blocks for 10,000 workers. Drainage systems for CSTP and CETP will extend to 75% of the GIDC area. Water recycling is expected to double to 10 MLD, and the estate will welcome its second Oxygen Park.

Meanwhile, renewable energy adoption will increase to 40% of industries. These developments continue to shape Sanand's path to Vision 2030, where innovation, clean energy, and inclusive growth go hand in hand.

Pharma Zone

Plastics Industry

Plastics Industry

Engineering Sector

Electronics Zone

Electronics Zone

Women-Led Park

Logistics Hub

Cooperative Bank

Lake Deepening / Rainwater Harvesting

# 2028

## Towards Full

# INTEGRATION

By 2028, Sanand GIDC is projected to reach full operational capacity, with sectoral zones like Pharma, Plastics, Engineering, Electronics, Women-Led Parks, and Logistics Hubs functioning at scale. A cooperative bank within the estate will enhance financial inclusion and streamline business operations.

Green cover will expand to 20% (around 400 hectares), and 80% of industries are expected to run on renewable energy. Rainwater harvesting will scale up to 2,000 million litres, supported by the redevelopment of 10 lakes and the construction of 200 recharge wells. Housing will continue to accommodate 10,000 workers, while AI-based security systems will enable 24x7 surveillance across the estate.

Drainage infrastructure for sewage and effluent treatment will achieve 100% coverage. Additional lake deepening will boost water resilience, supporting Sanand's move toward full water self-sufficiency.

With a complete industrial mix, inclusive planning, and sustainability at the core, 2028 will mark a milestone toward realizing Vision 2030—building a fully integrated, future-ready industrial township.

# 2029

## Towards Silicon **VALLEY STATUS**

By 2029, Sanand is expected to be recognised as India's Silicon Valley. Overbridges and underpasses will ease movement within the estate, while the number of MSME-listed companies continues to rise.

Green energy use across all common systems is likely to be near total, with waste management and water recycling systems operating on a large scale. Another Oxygen Park and lake rejuvenation efforts will boost the estate's environmental profile.

This year's growth is expected to reflect the near-complete realisation of Vision 2030, an ecosystem of innovation, green infrastructure, and global industrial relevance.

2030 marks the projected culmination of a decade-long transformation. A dedicated Skill University will be inaugurated to prepare industry-ready talent.

Rainwater harvesting capacity is expected to touch 2 lakh million litres, with Sanand becoming fully self-sufficient in water use. 10 developed lakes, 100% recycled water usage, and a zero industrial waste footprint will position Sanand as India's first truly circular industrial estate.

A central helpdesk for all government services and the fifth Oxygen Park will enhance governance and green space.

These milestones signify that Vision 2030 has not only been achieved but has become a model of industrial excellence, sustainability, and inclusive growth for India and beyond.

# 2030

Vision Realized,  
**FUTURE DEFINED**

# The JOUR

From the spark of the Nano car to the brilliance of the nanochip, Sanand GIDC has evolved into a symbol of India's industrial future. What started as a focused manufacturing cluster has transformed into a globally recognised, smart, and sustainable industrial powerhouse.

The coming years will bring new challenges, but also unprecedented opportunities. With the active support of government leadership, industrial stakeholders, and visionary planning, Vision 2030 is not just a target—it is a shared roadmap that connects growth with responsibility, infrastructure with sustainability, and development with dignity.

# NEY Ahead

At Sanand Industries Association (SIA), we remain committed to facilitating this transformation. Together, with unity and purpose, we will continue to make Sanand not only the pride of Gujarat but a global benchmark in industrial excellence.

## SANAND GIDC

Green, Smart, Future-Ready.

This is not just a destination. It is a commitment.

The Strategic Vision of **Mr.**

**Sandeep Agarwal**, Managing Director of Greenzo Energy India Limited, outlines a clear, multi-pronged strategic approach essential for the industry's success.

He defines **“Backward Integration not just as a goal, but as a strategic necessity,”**

emphasizing the critical need to encourage the local manufacturing of core components—cells, membranes, electrodes, and bipolar plates—stating clearly, "If we control our supply chain, we will control our future." This philosophy extends to fostering Collaborative Growth Over Competition.

He notes that with a demand of "10 GW by 2032 in India alone," the market "is

too big for individual players but perfect for collective success," thus advocating for an industry consortium to share R&D and promote joint ventures.

Furthermore, he highlights the necessity of Standardisation & Quality Assurance, urging the introduction of mandatory BIS standards for stack safety, arguing, "Standardisation will build trust, improve safety, and position India as a global electrolyser hub." Ultimately, he frames this domestic value creation as essential to capturing the Export Potential of the USD 12 trillion opportunity, concluding with a powerful call: "This is the time for Indian electrolyser manufacturers to come together... If we unite today, India will be a world leader in electrolyser manufacturing tomorrow."

**“Backward Integration – The Strategic Path to Make India a Global Leader in Electrolyser Manufacturing”**

## Industry Insight

India is poised to become a major hub for green hydrogen production, targeting 10 GW electrolyser manufacturing capacity by 2032. However, a crucial missing link in this journey is the lack of **backward integration** and dependence on imported components, which limits scalability, efficiency, and cost competitiveness.

India's ambition to establish a formidable **10 GW** electrolyser market is clearly visible through the launch of the **SIGHT PLI Scheme**, which has successfully galvanized investment and allocated **3,000 MW** of manufacturing capacity to major players like **Reliance (300 MW)**, **Adani**

(~300 MW), and **Waaree (300 MW)**. Yet, a nuanced dialogue is emerging within the electrolyser community regarding the execution of true **Backward Integration**.

Developers championing indigenous technology, such as **Greenzo Energy**, offer the perspective that while the capacity targets are met, the policy's design could benefit from further refinement. The concern articulated is that, by placing a heavy emphasis on capital and scale, the scheme might inadvertently risk creating a large-scale **system assembly** operation (meeting the DVA mandate through integration), rather than truly supporting the crucial **R&D and manufacturing** of core stack components—namely membranes, bipolar plates, and specialized electrode materials—which remain heavily imported.

## Current Scenario of Electrolyser Industry in India

The demand for electrolyser technology is rapidly increasing due to:

- National Green Hydrogen Mission
- Renewable energy push & decarbonization targets
- Government incentives and FDI interest
- However, most core components such as membranes, MEA (Membrane Electrode Assembly, Electroplating units, Electrode coating facilities, Storage tanks & pressure vessels , Gasket and control systems are being imported. This leads to:
  - High production cost
  - Long supply chains
  - Quality inconsistencies
  - Limited speed of deployment

## Why Backward Integration Is Critical

Backward integration means manufacturing core raw materials and components and processes in-house or locally. For electrolysers, it involves development of:

- Membranes & MEA
- Electroplating units
- Electrode coating facilities
- Membrane manufacturing
- Storage tanks & pressure vessels
- Gasket
- Critical engineering components

- Other specialised fabrication capabilities.

## Collaboration Over Competition

The industry must shift from isolated manufacturing to strategic collaboration.

Suggested Industry Approach:

- Form a consortium of Indian electrolyser manufacturers
- Share non-critical R&D; and generic technologies
- Leverage backward integration across shared facilities
- Co-develop indigenous component supply chain
- Align with government bodies for BIS standardization

## BIS Standardisation – Foundation of Quality & Trust

Urgent need for Bureau of Indian Standards (BIS) to implement specifications for:

- Stack design & safety parameters
- Performance benchmarks (kWh/Nm<sup>3</sup> efficiency)
- Components lifecycle & corrosion resistance
- Storage, hydrogen purity, and safety compliance

## National Benefits of Backward Integration

- Cost Reduction
- Energy Security
- Export Potential
- Job Creation
- Innovation & IP

## Strategic Recommendations

1. Establish component manufacturing clusters for electrolysers
2. Government incentives for domestic manufacturing under PLI scheme
3. Collaborative R&D; to improve cell efficiency
4. Alignment with green hydrogen mission for local sourcing targets
5. Industry leadership to drive standardization and technical training.

## Conclusion

Backward integration is not just beneficial—it is essential for India's electrolyser industry to achieve cost leadership, global competitiveness, and self-reliance.

If Indian manufacturers unite now to build the supply chain and standardize technology, the nation can lead the global green hydrogen revolution

# K.P. Woven Private Limited

A Champalal Group Company

**Mr. Prakash Parekh**  
Promoter

Prakash Parekh, its promoter is a strong, fearless businessman. He is a Chemical Engineer with a post-graduation degree in SAP from Monash University. He is also the Managing Director of Flagship company of the group Plastene India Limited, which he has built from the ground zero in just a span of 14 years. With over 22 years of experience in the Plastic Industry, he is stalwart of this industry. Equipped with a lot of experience and great analytical skills he is a magician of management.

**Mr. Pritesh Parekh**  
Director

Pritesh Parekh, the Director is a PGDM holder in Business Management from Tollani Institute of Management. He has over 20 years of experience in the Plastic industry. Specialising in operations and sales and because of his great can-do attitude and empathy towards the manpower and our clients he holds command on operation and marketing. Pritesh is responsible for managing almost 3000 MT of market for K. P. Woven and all its sister concerns in the Champalalgroup.

K.P. Woven Private Limited is a part of renowned Champalal Group of companies engaged in the manufacturing of Flexible Intermediated Bulk Containers (FIBCs) or Jumbo bags. Group is second largest manufacturer of FIBC in India. This unit was specifically put up to cater to the requirements of Food and Pharmaceutical industry to meet their requirements of bulk packaging needs.

Equipped with State of the art machinery sourced from the best suppliers in India and Europe. It's Swiss weaving machinery from Sulzer equips the company to also manufacture various kinds of Geotextiles which can serve various purposes and are useful in various industries. With installed capacity of over 1100 MT of woven plastic products, this plant is one of the best in the country, and we are targeting 90% of its sales from exports. Majority of its clients are based in the USA, Europe and South America, while also catering to some of the big names in the domestic chemical industry.

Apart from that, this facility is one of a kind facility with complete air conditioning from granules to bag hence eliminating the risk of contamination. K.P. Woven firmly believes in supplying its costumers with top quality bulk bags which are extremely safe to use and have a great visual appeal. We have a zero tolerance policy towards taking deviation and believe in supplying our costumers with exactly what they need.

## A LANDMARK MOMENT FOR GLOBAL TRADE

Industries of GIDC Sanand welcome the historic India-EU Trade Agreement, driving global collaboration, export growth, investments, and India's position as a trusted manufacturing and trade partner.

### ACKNOWLEDGING VISIONARY LEADERSHIP

We extend our sincere gratitude to  
**Hon'ble Prime Minister Shri Narendra Modi Ji**  
For his decisive leadership and tireless efforts in securing a transformative agreement for India's future

#### TOWARDS A STRONGER INDIA

Atmanirbhar Bharat | Global Trade | Sustainable Growth

[www.sanandgdc.org](http://www.sanandgdc.org)

A powerful handshake.

A stronger global connect.

India steps forward with confidence, vision, and purpose. The India-EU trade partnership opens new doors for collaboration, manufacturing growth, and global opportunities. Sanand's industries stand ready to contribute, innovate, and scale on the world stage. India-EU Trade, Global manufacturing, Industrial growth, Leadership, Atmanirbhar Bharat

Building tomorrow's industrial ecosystem, today.

Planned spaces. Seamless connectivity.

Future-ready facilities.

Where businesses don't just set up—they scale with confidence.

A destination designed for innovation, efficiency, and sustainable growth.

Because strong foundations create stronger industries.

[Smart Parks, Industrial Growth,

Future Infrastructure, Business Ecosystem, Sustainable Development]

### Smart infrastructure. Smarter industries. At SIA, industries don't just grow they evolve.

[www.sanandgdc.org](http://www.sanandgdc.org)

## **Marelli-Motherson જોઇન્ટ વેનચરે સાણંદમાં બીજો ઓટોમોટિવ લાઇટિંગ પ્લાન્ટ ખોલ્યો!**

“

આ ૫૦:૫૦ પાર્ટનરશિપ છે સમવર્ધના મધરસન ઇન્ટરનેશનલ (ભારતીય ઓટો કોમ્પોનન્ટ જાયન્ટ) અને મારેલી (ઇટાલિયન ઓટોમોટિવ ટેકનોલોજી કંપની, કોડાક ગ્રુપની સબ્સિડિયરી) વચ્ચે. આ JV ૨૦૨૪માં શરૂ થયું હતું

”

### **પ્લાન્ટમાં એક્સ્ટરિયર લાઇટિંગ સિસ્ટમ્સ બનશે, જેમાં:**

- હેડલામ્પ્સ (LED અને લેઝર-આધારિત અદ્યતન મોડલ્સ).
- ટેલલામ્પ્સ, ફોગ લાઇટ્સ અને ડે-ટાઇમ રનિંગ લાઇટ્સ (DRL).
- આ બધું ભારતીય માર્કેટ માટે ખાસ, જેમાં પ્રીમિયમ વાહનો (ટાટા, મારુતિ, હ્યુન્ડાઇ વગેરે) માટે અનુકૂળ ટેકનોલોજી ઉપયોગમાં લેવાશે. પ્લાન્ટમાં ઇન્ડિયા-ફર્સ્ટ ટેકનોલોજીઓ જેમ કે અદ્યતન LED મોડ્યુલ્સ અને ઓટોમેટેડ ટેસ્ટિંગ સિસ્ટમ્સ આવશે.

# Sanand Industries Association

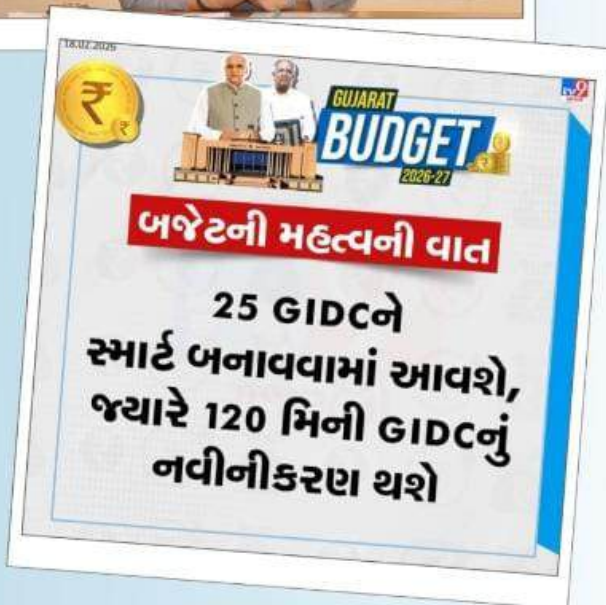

## હાર્દિક આભાર અને અભિનંદન

માન. મુખ્યમંત્રી શ્રી ભૂપેન્દ્રભાઈ પટેલના દ્રઢ અને વિકાસલક્ષી નેતૃત્વ હેઠળ, માનનીય શ્રી હર્ષભાઈ સંઘવીજીના સક્રિય પ્રયત્નો અને સંવેદનશીલ અભિગમના પરિણામે, માનનીય શ્રી કનુભાઈ દેસાઈજી તથા માનનીય શ્રી જયરામભાઈ ગામીતજીના સહકાર સાથે,

### સાણંદ ઇન્ડસ્ટ્રીઝ એસોસિએશનની

રજૂઆતને માત્ર ત્રણ મહિનાના ટૂંકા ગાળામાં રાજ્યના બજેટમાં સ્થાન મળવું — ઉદ્યોગ જગત માટે એક મહત્વપૂર્ણ સિદ્ધિ છે. માનનીય શ્રી હર્ષભાઈ સંઘવીજીનો વિશેષ આભાર વ્યક્ત કરીએ છીએ કે જેમણે ઉદ્યોગકારોની લાગણીઓ અને આવશ્યકતાઓને પ્રાથમિકતા આપી. ગુજરાત સરકારની ઉદ્યોગમૈત્રી નીતિઓ રાજ્યના વિકાસને નવી દિશા આપી રહી છે.

# આભાર
