Ajit Shah

President on behalf of team SIA

From the desk of the President

Dear Members,

It gives me immense pleasure to share the progress and future vision of the Sanand Industries Association (SIA). Over the years, SIA has continuously worked towards creating a stronger industrial ecosystem in GIDC Sanand, and today we stand at the threshold of several significant milestones.

One of our most important initiatives is the commencement of the Mini ITI and Industrial Training Centre. This unique project is being developed by the industries, for the industries, with the objective of creating a skilled workforce that meets the evolving needs of modern manufacturing. The training centre will bridge the gap between industry requirements and workforce availability, ensuring sustainable growth for industries in the region.

Environmental sustainability remains another key focus area for SIA. The plantation drive undertaken in GIDC Sanand is not merely an environmental activity but a commitment towards building a greener and healthier industrial estate for future generations. We are inspired and motivated by the vision of our Hon'ble Home Minister and Member of Parliament, Shri Amitbhai Shah, who has consistently encouraged large-scale tree plantation and environmental conservation.

Responding to this call, the industries of GIDC Sanand have collectively pledged to plant one lakh trees during the current year. This ambitious target reflects our dedication towards environmental responsibility and our determination to transform Sanand into one of the greenest industrial estates in Gujarat. SIA will continue to ensure proper plantation, maintenance, watering, and care of these trees so that they become a lasting asset for the region.

Along with these initiatives, we are actively pursuing several development projects, including infrastructure improvements, worker welfare facilities, skill development programs, environmental management, and smart industrial estate initiatives. These efforts are aligned with our Vision 2030 Document, which serves as a roadmap for the future development of GIDC Sanand.

I firmly believe that with the continued support, participation, and commitment of our member industries, we will successfully achieve every milestone outlined in our Vision 2030 plan. Together, we can make GIDC Sanand a model industrial estate known for innovation, sustainability, skill development, and inclusive growth.

I sincerely thank all members, stakeholders, government departments, and supporters who have contributed to the journey of SIA. Your trust and cooperation are the driving force behind our success.

Let us continue working together to build a stronger, greener, and more prosperous Sanand.

With warm regards,

Ajit Shah

President on behalf of team SIA

From the desk of the Secretary

Sharadkumar Patel
Secretary, Sanand GIDC

Dear Members,

It gives me immense pleasure to share the progress and future vision of the Sanand Industries Association (SIA). Over the years, SIA has continuously worked towards creating a stronger industrial ecosystem in GIDC Sanand, and today we stand at the threshold of several significant milestones.

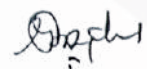

At SIA, we are not only addressing today's challenges but also building tomorrow's opportunities. Through initiatives such as the Mini ITI & Industrial Training Centre, One Lakh Tree Plantation Mission, enhanced fire & emergency services, infrastructure development, worker welfare programs, and sustainable waste management practices, we are creating a stronger foundation for future growth.

Our Vision 2030 is clear—to transform GIDC Sanand into a world-class industrial estate driven by skilled manpower, smart infrastructure, environmental sustainability, industrial safety, and innovation. Every project we undertake today is a step towards achieving that vision.

I sincerely thank all our members, partners, and stakeholders for their continued support. Together, we are shaping not just an industrial estate, but a sustainable and prosperous future for generations to come.

“Together We Build. Together We Grow. Together We Lead.”

Best wishes,

Sharadkumar Patel
Secretary, Sanand GIDC

SIA NEWS

Sanand Industries Association

The Invisible Engine of Industry.

Inside Filter Concept's mission to engineer the filtration solutions the world's most demanding industries depend on, and the facility built to deliver them.

Most industries will tell you what they make. Filter Concept will tell you what it protects. That distinction, subtle on the surface but fundamental in practice, is what has driven the Ahmedabad-based filtration company from a single office in Gujarat to a presence across 90 plus countries, serving over 5,000 customers in some of the most process-critical environments on the planet.

Filtration, as Filter Concept practises it, is not a support function. It is the difference between a refinery running at peak efficiency and one falling short. It is the difference between a pharmaceutical batch that meets sterility standards and one that fails them. It is the difference between a power plant operating within emission compliance and one facing regulatory action. At that level of consequence, the quality of a filtration solution is not a procurement detail. It is an operational decision with a direct bearing on output, safety, and long-term viability.

When Mr. Mehul Panchal founded Filter Concept in 2002, this was precisely the gap he set out to close. The filtration industry at the time was largely transactional. It was catalogue-driven, specification-led, and largely indifferent to what happened after delivery. His approach was built on something entirely different: application analysis. Understanding each customer's process conditions, their operating environment, and their performance expectations before a single component was ever specified. It was a more demanding model, and a slower one in the early years. But it produced results that catalogue selling never could. Industries noticed. Multinationals followed. And over two decades, Filter Concept grew into what it is today, a Filtration Intelligence Company that functions not as a manufacturer & exporter, but as a long-term engineering partner.

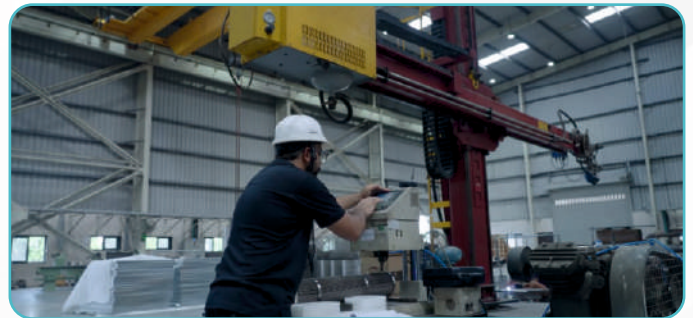

"We are not in the business of supplying filters. We are in the business of guaranteeing outcomes." - Mr. Mehul Panchal, CMD, Filter Concept Pvt. Ltd.

Today, Filter Concept's industrial filtration solutions span air, gas, and liquid filtration across more than 50 industries. Oil and Gas, Petrochemicals, Pharmaceuticals, Power Generation, Cement, Water Treatment, Steel, Food and Beverage, Chemicals, Textiles, Mining, and several more. What holds this breadth together is a non-negotiable commitment to precision at every stage. The company deploys state-of-the-art technology and enforces stringent quality control measures across all its operations. Not as a compliance exercise, but because it understands, from over two decades of application engineering, that the margin between a plant that performs and one that underperforms is often no wider than the quality of its filtration system.

Sanand Industries Association

To deliver on that commitment at a global scale required a facility built to match it. Filter Concept's answer is its manufacturing plant at GIDC Sanand II in Ahmedabad. Spanning 1,30,000 square feet of purpose-configured production space, it stands as one of the most comprehensive filtration manufacturing operations in India. Designed from the outset as a green building, Sanand reflects the same principles Filter Concept applies to its customers: that operational excellence and environmental responsibility are not competing priorities but two expressions of the same intent.

Inside the facility, three specialised production divisions operate with a level of process discipline that mirrors the industries the company serves. Filter systems are fabricated to ASME, DIN, and BS international design standards, with every unit passing through comprehensive testing protocols before it is cleared for dispatch. Filter elements are produced in-house across the full spectrum of filtration media, from sub-micron pharmaceutical-grade configurations through to heavy industrial macro-filtration. Large-scale dust collection systems, gas turbine air intake assemblies, and custom-engineered industrial enclosures are built in the heavy fabrication division, designed to perform under the thermal loads and particulate conditions found in power generation, cement, and petrochemical environments. From the moment raw materials arrive at Sanand to the moment a finished system leaves it, nothing is cleared without meeting the standard the facility was built to uphold.

That standard is independently verified. Filter Concept holds ISO 9001:2015 for Quality Management, ISO 14001:2015 for Environmental Management, and ISO 45001:2018 for Occupational Health and Safety. Products are CE certified, manufacturing conforms to ASME, DIN, and BS specifications, and the company holds multiple patents across its proprietary filtration technologies. These are not credentials accumulated for market positioning. They are the operating baseline at Sanand, and the reason Filter Concept's solutions are accepted in markets that hold their supply chains to the highest global standards.

The companies that choose Filter Concept make that proof tangible. Its client base includes Fortune 200 corporations running refineries in the Middle East, pharmaceutical operations across Europe, power generation infrastructure in Asia, and water treatment facilities across the Americas. These are organisations whose procurement standards rank among the most demanding in their respective sectors. Their continued engagement with Filter Concept, across repeat orders, multi-site projects, and long-term service agreements, reflects something more meaningful than a competitive price point. It reflects trust, earned through consistent performance and genuine engineering accountability, sustained over time.

The filtration industry is shifting. Environmental regulations are tightening globally. Energy efficiency has moved from a preference to a requirement. The expectation of verifiable, documentable operational performance is becoming the baseline in every major procurement conversation. Filter Concept has not been waiting to respond to these changes. It has been building towards them, through the engineering depth at Sanand, the application expertise its teams bring to every customer engagement, and an unrelenting belief that the most important filtration solution the company will ever deliver is the one it has not yet built. For an industry the world depends on but rarely thinks about, that is a quietly significant place to stand.

Industrial Waste Management Transformation at GIDC Sanand-II

A Strategic Step Towards Compliance, Sustainability, and Circular Economy

By [Sanand Industries Association \(SIA\)](#)

ZenviroEdge

Innovative Solutions for a Sustainable Future

Jignesh Anil Bhatt
Director

Introduction: A New Era of Industrial Responsibility

Industrial development and environmental responsibility must go hand in hand. Recognizing this critical balance, the Sanand Industries Association (SIA) has taken a landmark step by launching organized Solid Waste Collection and Management Services at GIDC Sanand-II.

To ensure professional execution and regulatory compliance, SIA has authorized ZenviroEdge Private Limited as the official agency for managing solid waste collection, segregation, and disposal for industries in the cluster.

This initiative is fully aligned with the latest Solid Waste Management Rules, 2026 (India), which came into effect on 1st April 2026, replacing earlier frameworks and introducing a more stringent, accountable, and technology-driven waste management regime.

Understanding SWM Rules 2026: What Has Changed?

The 2026 rules mark a paradigm shift from basic waste collection to accountability, traceability, and circular economy integration.

1. Mandatory Four-Way Segregation at Source

Every waste generator, including industrial units, must now segregate waste into four categories:

- Wet Waste: Food waste, biodegradable material
- Dry Waste: Plastic, paper, metal, glass
- Sanitary Waste: Hygiene-related waste
- Special Care Waste: Hazardous domestic items like bulbs, batteries, medicines

Segregation at source is non-negotiable, and unsegregated waste may not be accepted by collection agencies.

2. Polluter Pays Principle (Strict Enforcement)

Industries failing to comply will face environmental compensation penalties, imposed by authorities such as the Central Pollution Control Board and State Boards.

3. Bulk Waste Generator (BWG) Responsibility

Industries generating:

- >100 kg/day waste, OR
- Large operational scale

are classified as Bulk Waste Generators (BWG) and must:

- Process waste at source (if feasible)
- Or ensure authorized disposal through certified agencies
- Maintain records and documentation

4. Digital Monitoring & Compliance

A centralized digital system is being introduced for:

- Waste tracking
- Compliance reporting
- Audit and verification

This marks a shift toward transparent and data-driven governance.

5. Landfill Restrictions

Landfills are now restricted to:

- Non-recyclable
- Non-recoverable
- Inert waste only

Dumping mixed waste is discouraged through higher penalties.

6. Promotion of Circular Economy

Industries are encouraged to:

- Use Refuse Derived Fuel (RDF)
- Reduce landfill dependency
- Promote recycling and recovery

Implications for Industries at GIDC Sanand-II

The new rules are not just regulatory—they require operational transformation.

Industries must now:

- Redesign internal waste handling systems
- Train staff for segregation
- Maintain compliance documentation
- Partner with authorized waste agencies

Failure to comply can lead to:

- Financial penalties
- Legal complications
- Reputational damage

SIA Initiative: A Collective Solution

To support industries in this transition, SIA has introduced a centralized, compliant, and efficient waste management system.

Why This Initiative is Critical

- Eliminates fragmented waste handling practices
- Ensures compliance with SWM Rules 2026
- Reduces individual industry burden
- Promotes a cleaner industrial ecosystem

Role of ZenviroEdge Private Limited

As the authorized agency, ZenviroEdge Pvt. Ltd. will manage the entire waste lifecycle for industries.

Scope of Services

- Door-to-door waste collection
- Scientific segregation and handling
- Transportation to authorized facilities
- Recycling and resource recovery
- Compliance support and documentation

Their approach is aligned with the philosophy of:

“Waste to Worth” – Converting waste into valuable resources

Practical Guidelines for Industries

To comply effectively, industries at GIDC Sanand-II should adopt the following best practices:

1. Implement Internal Segregation Systems

- Install color-coded bins
- Train housekeeping and staff
- Ensure no mixing of waste streams

2. Maintain Waste Records

- Daily waste generation logs
- Disposal records
- Vendor documentation

3. Avoid Unauthorized Disposal

- Never dump waste in open areas
- Use only authorized agencies like ZenviroEdge

4. Process Waste Where Possible

- Compost food waste
- Recycle dry waste internally or through vendors

5. Compliance Documentation

- Maintain agreements with waste handlers
- Ensure proper manifests and receipts
- Be ready for inspections and audits

6. Employee Awareness

- Conduct internal training programs
- Display segregation guidelines
- Encourage responsible practices

Business Benefits Beyond Compliance

While compliance is mandatory, this initiative offers strategic advantages:

1. Cost Efficiency

Centralized services reduce overall waste management costs.

2. ESG & Sustainability Alignment

Supports Environmental, Social, and Governance (ESG) goals.

3. Improved Industrial Image

A clean and organized industrial estate attracts investors and global partners.

4. Risk Mitigation

Avoids penalties and legal exposure.

5. Resource Recovery

Waste becomes a secondary raw material, supporting circular economy.

Future Vision: Smart Waste Management Ecosystem

SIA aims to further strengthen this initiative through:

- Food waste composting plants
- Digital waste tracking dashboards
- Recycling partnerships
- Carbon credit opportunities
- Awareness and training programs

This will position GIDC Sanand-II as a model industrial cluster for sustainable waste management in India.

Conclusion: A Collective Responsibility

The Solid Waste Management Rules, 2026 (India) represent a strong national push towards environmental accountability and sustainability.

SIA's initiative, in partnership with ZenviroEdge, is a forward-looking step that not only ensures compliance but also builds a foundation for a cleaner, smarter, and more sustainable industrial future.

Call to Action

All industries at GIDC Sanand-II are encouraged to:

- Participate actively in the SIA waste management program
- Adopt segregation practices immediately
- Collaborate for a cleaner environment

Together, Let's Build a Cleaner Industrial Future

Smart Waste. Sharp Edge. Waste to Worth.

About the Foundation

Tagarawala Foundation is a philanthropic and charitable trust envisioned by Nishal Sunir Shah, dedicated to the service of humanity, social welfare, art and culture, and seva of Jain saints. Inspired by timeless spiritual values, the Foundation seeks to create meaningful and sustainable social impact through selfless service and ethical action.

The Foundation is established in the loving memory of Late Shri Jasubhai Chunilal Shah, Great Grandfather, and the visionary founder of the Tagarawala Group in 1940, whose life exemplified integrity, compassion, foresight, and dedicated service to society. His enduring values continue to guide the Foundation's philosophy, purpose, and commitment to social responsibility.

Rooted in the Jain ideals of Ahimsa (non-violence), Aparigraha (non-possessiveness), Satya (truth), and Seva (selfless service), Tagarawala Foundation works toward the holistic upliftment of society while preserving and promoting spiritual, cultural, and ethical heritage.

1. Vision – Mission – Objectives Clause

◆ Vision

To create a compassionate, ethical, and inclusive society inspired by spiritual wisdom, where service to humanity, cultural preservation, and reverence for all life form the foundation of sustainable development.

◆ Mission

To serve society through charitable, humanitarian, cultural, and spiritual initiatives rooted in the principles of Jain philosophy, with a focus on selfless service, ethical conduct, and long-term social impact.

Five-Year Roadmap / Future Plan

- ◆ Year 1–2: Foundation & Structuring
- ◆ Year 3: Expansion & Partnerships
- ◆ Year 4: Consolidation & Impact
- ◆ Year 5: Sustainability & Legacy

Sanand Industries Association

CSR Impact Statement

Tagarawala Foundation aligns with Corporate Social Responsibility (CSR) objectives by addressing social, cultural, and ethical dimensions of development. The Foundation's initiatives contribute to inclusive growth by supporting humanitarian causes, preserving cultural heritage, and promoting ethical values inspired by Jain philosophy.

Founder's Message

Message from the Founder – Nishal Sunir Shah [BE-EEE- BITS-PILANI]

Tagarawala Foundation was conceived as a humble offering of gratitude and responsibility—gratitude toward the values passed down by our Great Grandfather, Late Shri Jasubhai Chunilal Shah, and responsibility toward society at large.

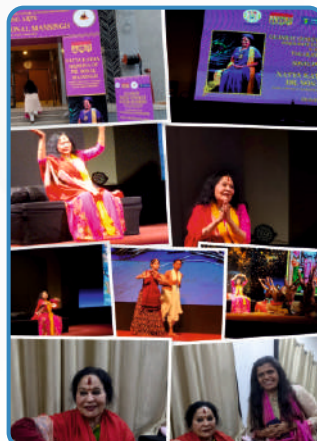

His life taught us that true success lies not merely in material achievement, but in service rendered with integrity, compassion, and humility. Inspired by his legacy and guided by Jain principles of Ahimsa and Seva, this Foundation seeks to contribute meaningfully to society while preserving our spiritual and cultural heritage.

ACTIVITIES

NGO AND CHARITABLE TRUST FOUNDATION [ACTIVITIES IN THE FIELD OF EDUCATION, HEALTH, WOMEN EMPOWERMENT, ART/CULTURE & HERITAGE , CSR ACTIVITY , DRAMA, RELIGIOUS SPORTS, DISATER /URBAN-RURAL RENEWAL/TRANSFORMATION AND VARIOUS TYPES OF SOCIAL ACTIVITIES]

🇮🇳 Honored to represent Gujarat's culture at the Republic Day Parade in Delhi with Tagarawala Foundation & Sonal Performing Arts! 🌟

Shram Niketan – A Modern Dormitory Solution for Industrial Workforce at GIDC Sanand-II

As Gujarat continues to emerge as one of India's leading industrial destinations, the need for quality accommodation for industrial workers has become increasingly important. Recognizing this requirement, the Sanand Industries Association (SIA), in collaboration with Gujarat Labour Welfare Board, has introduced "**Shram Niketan – Workers' Hostel**", a modern dormitory facility strategically located at Bol Char Rasta, GIDC Sanand-II.

A Home Away from Home for Industrial Workers

Industrial growth brings thousands of skilled and semi-skilled workers to manufacturing hubs every year. Providing safe, hygienic, and affordable accommodation is essential not only for worker welfare but also for improving productivity and employee retention.

Strategic Location Advantage

Situated at Bol Village Cross Road, GIDC Sanand-II, Shram Niketan offers excellent connectivity to nearby industrial units. Its central location significantly reduces daily commuting time, enabling workers to reach their workplaces efficiently and safely.

Modern Infrastructure and Comfortable Living

- Beds and storage cupboards
- Adequate lighting and ceiling fans
- Clean and hygienic surroundings
- Continuous drinking water supply
- Well-maintained toilet and sanitation facilities

Focus on Safety and Sustainability

- CCTV surveillance for enhanced security
- Professional facility management
- Well-maintained common areas
- Solar power systems for sustainable energy utilization

Facilities Beyond Accommodation

- Modern Gymnasium
- Recreation Room
- Indoor Games Facilities
- Meditation Hall
- Canteen Facility
- Landscaped Garden Area

Supporting Industrial Growth

- Reduce worker transportation challenges
- Enhance worker satisfaction and retention
- Create a healthier and safer living environment for employees

Contact for Booking : Shram Niketan – Workers' Hostel

 Bol Char Rasta, GIDC Sanand-II, Ahmedabad  +91 99980 10132, +91 97373 78111

SHRAM NIKETAN

WORKERS' HOSTEL

@ BOL CHAR RASTA, SANAND GIDC

Key Dormitory Features

- Centrally Located at BOL Village Cross Road
- 150 Rooms with Beds & cupboards, Lights, Fans
- Quick, Efficient & Hygiene rooms
- Drinking Water, Toilets
- CCTV, Solar Panels,
- Cold & Hot water
- Canteen
- Gymnasium
- Recreation Room
- Indoor Games
- Meditation Hall
- Badminton Court
- Garden

Each Dormitory Room will accommodate 8 workers

SIA NEWS

Sanand Industries Association

Honoured to represent SIA during a courtesy visit to Hon'ble Ahmedabad Mayor Shri Hitesh Barot & had a productive & forward-looking discussion on the development vision for Ahmedabad and the rapidly growing regions of Sanand. interaction focused on infrastructure, industrial expansion, urban planning, and creating sustainable growth opportunities that will strengthen position as a key economic & investment hub.

It was inspiring to exchange ideas on building a cleaner, greener & more prosperous future for Ahmedabad and its nearby areas. We appreciate the Mayor's leadership & commitment towards inclusive development and look forward to supporting initiatives that contribute to the continued progress.

Together, Shaping The Future Of Ahmedabad, Sanand.

Today, representatives of Sanand Industries Association (SIA) had a very positive and productive meeting with Shri Santosh Vasta, GST Commissioner. During the meeting, various difficulties and practical issues being faced by industries in GIDC Sanand were discussed in detail.

We are pleased to share that Shri Santosh Vasta appreciated the concerns raised by the industry members and graciously approved our request to organize an interactive session with the industries of GIDC Sanand. He has also assured us of a visit to GIDC Sanand during the period of 20th to 25th June 2026 for direct interaction with industrial units and to better understand their challenges.

The meeting concluded on a highly positive note, reflecting the GST Department's commitment towards supporting industrial growth and maintaining a healthy dialogue with the industry. We sincerely thank Shri Santosh Vasta for his positive approach and valuable support.

Centralized STP for Sustainability

- What happens to industrial wastewater after use?
- At SIA, it doesn't go to waste it gets treated, reused, & managed responsibly through a centralized STP system.

Building industries that respect the environment.

www.sanandgidc.org

Waste Isn't The End. It's A New Beginning.

Every drop has a second life when managed right. Smart systems. Cleaner processes. Better outcomes.

Industries today are not just about production. They are about responsibility.

They are about protecting tomorrow while working today.

Sustainability is not a choice anymore.

It's the standard we build on.

Think Industries Can Grow Without Environmental Rules?

Think again.

From managing waste to controlling emissions, regulations guide responsible operations.

Sustainability isn't optional anymore—it's a business necessity.

It builds trust, protects the planet, and ensures long-term growth.

Growth today must align with a greener tomorrow.

STANDARD GASSHIELD PVT. LTD.
ENSURING SAFETY

Comprehensive Gas Solutions – For Every Industry Need

At STANDARD GASSHIELD PVT. LTD., we specialize in supplying a complete range of gases to cater to diverse industrial and commercial applications. With a strong focus on safety, quality, and reliability, we ensure seamless availability of gases across categories:

Industrial Gases

We offer a wide range of industrial gases essential for manufacturing, fabrication, and processing industries, including:

Oxygen (O₂), Nitrogen (N₂), Argon (Ar), Carbon Dioxide (CO₂), Hydrogen (H₂), Acetylene (C₂H₂)

Refrigerant Gases

Our refrigerant solutions support HVAC, cold storage, and refrigeration industries with high-performance and compliant gases such as:

R134a, R404A, R410A, R22, R32, Ammonia (NH₃) & Aerosol Cans R134a, R600, R290, R32, R410, R438 & Hydrocarbon

Specialty & Mixed Gases

We provide high-purity specialty gases and customized gas mixtures for precision applications in laboratories, pharmaceuticals, calibration, and research:

Helium (He), Calibration Gas Mixtures, Zero Air, Specialty Gas Blends, Medical Gases

Fire Safety

We supply all types of fire cylinders and extinguishers to ensure your facility remains compliant and safe. Additionally, we provide professional Cylinder Testing Services to maintain the integrity and longevity of your equipment.

K.P. Woven Private Limited

A Champalal Group Company

Mr. Prakash Parekh
Promoter

Prakash Parekh, its promoter is a strong, fearless businessman. He is a Chemical Engineer with a post-graduation degree in SAP from Monash University. He is also the Managing Director of Flagship company of the group Plastene India Limited, which he has built from the ground zero in just a span of 14 years. With over 22 years of experience in the Plastic Industry, he is stalwart of this industry. Equipped with a lot of experience and great analytical skills he is a magician of management.

Mr. Pritesh Parekh
Director

Pritesh Parekh, the Director is a PGDM holder in Business Management from Tollani Institute of Management. He has over 20 years of experience in the Plastic industry. Specialising in operations and sales and because of his great can-do attitude and empathy towards the manpower and our clients he holds command on operation and marketing. Pritesh is responsible for managing almost 3000 MT of market for K. P. Woven and all its sister concerns in the Champalalgroup.

K.P. Woven Private Limited is a part of renowned Champalal Group of companies engaged in the manufacturing of Flexible Intermediated Bulk Containers (FIBCs) or Jumbo bags. Group is second largest manufacturer of FIBC in India. This unit was specifically put up to cater to the requirements of Food and Pharmaceutical industry to meet their requirements of bulk packaging needs.

Equipped with State of the art machinery sourced from the best suppliers in India and Europe. It's Swiss weaving machinery from Sulzer equips the company to also manufacture various kinds of Geotextiles which can serve various purposes and are useful in various industries. With installed capacity of over 1100 MT of woven plastic products, this plant is one of the best in the country, and we are targeting 90% of its sales from exports. Majority of its clients are based in the USA, Europe and South America, while also catering to some of the big names in the domestic chemical industry.

Apart from that, this facility is one of a kind facility with complete air conditioning from granules to bag hence eliminating the risk of contamination. K.P. Woven firmly believes in supplying its customers with top quality bulk bags which are extremely safe to use and have a great visual appeal. We have a zero tolerance policy towards taking deviation and believe in supplying our customers with exactly what they need.
